Unmatched Reliability | Quality | Service Support

WHY CHOOSE TD REMAN AS YOUR CVT PARTNER?

TD REMAN specializes in the remanufacturing and wholesale distribution of JATCO CVT transmissions. Our staff includes a highly seasoned team of CVT experts with more combined experience remanufacturing CVTs than anyone else in the industry. We literally wrote the book on CVT diagnostics and repair. At the foundation of our organization are three core tenets; **unmatched reliability, quality and technical service support.**

TD REMAN is able to provide high quality units by partnering with the industry's leading manufacturers using best-in-class components. Some of the components we use in each unit are:

- Toledo TransKit® overhaul kits
- New Bosch® belts
- New LuK® chains
- Hi-Per Blue® pistons
- Exedy® friction modules
- SAP® bushings
- New Nissan® valve bodies
- Dynamic® torque converters

OUR PROPRIETARY ASSEMBLY PROCESSES

All remanufactured CVT units undergo a strict 4 step process: *Inspect, Replace, Remanufacture, and Dyno-Test.* Part of our process includes new CVT torque converter, upgrading anaerobic sealant, weld-reinforcing reluctors, and upgrading primary pulley apply pistons.

Inspect

Rigorous inspection process to ensure all components are in excellent working condition, with all sealing surfaces carefully repolished and precision-finished for quality.

Replace

High-quality components in every unit to ensure consistent reliability.

Remanufacture

Remanufactured by skilled technicians to exceed OE standards delivering quality and performance.

Dyno-Test

Each CVT unit is 100% Dyno-tested under simulated driving conditions to guarantee quality.

INDUSTRY-LEADING 36 MONTHS/36,000 MILES WARRANTY

At TD REMAN, we stand behind each of our CVT units with our industry-leading 36 months/36,000 miles warranty.

Not only do we go beyond our competition— we go beyond the dealer! Dealer warranties often result in \$700 and more out-of-pocket expenses.

With our nationwide on-site programming, we can have a technician update your TCM at your shop without the need for expensive tow bills, delays, or dealer programming fees.

Our techs will ensure your vehicle is updated within 24hrs and your customer is back on the road.

TD REMAN

Vs.

Dealer Warranty

Replacement unit only after dealer approval and expensive diagnostic fees

Repay for towing to dealer

Repay for dealer flash reprogramming

Repay for transmission fluid

Repay for flush cooler

Mandatory purchase of expensive and unnecessary single, one-time parts use
